Manufacturing Coordination

What does Manufacturing Coordination mean?

An increasingly complex electric, autonomous prototype racing car goes hand in hand with increasingly complex and costly production of the individual components. To be able to support all partners and have the components manufactured on time, we need your help with our external manufacturing coordination. In addition to looking after existing partners and components, you will also be involved in the acquisition of new partners and thus organise the administrative side of manufacturing.

What will your tasks be?

- Familiarisation with existing workflows and the required software
- Contact with various partners from industry and institutes
- Complete management of individual components/partners in production
- Acquisition of new partners
- Collaboration on mechanical tasks (e.g. component manufacturing monocoque, aerodynamics)
- Collaboration on cross-group tasks (e.g. testing, quizzes)

What are our requirements for you?

- Motivation and team spirit
- Interest in production technology
- Skilled craftsmanship
- Participation in weekly appointments
- Knowledge of project management
- Structured, independent way of working
- Experience in design with Siemens NX advantageous

One goal.
One team.
